IN THE MATTER OF: BID PROTEST

DECISION

LANGSTON CONSTRUCTION CO.
OF PIEDMONT, LLC

CASE NO. 2009-020

v.

SPARTANBURG COMMUNITY
COLLEGE

POSTING DATE:
AUGUST 7, 2009

SPARTANBURG-TRB FRONT OFFICE)
PHASE 1 MODULAR OFFICE/WALL)
SYSTEM)
PROJECT H59-N518-JM)
_____)

This matter is before the Chief Procurement Officer for Construction (CPOC) pursuant to a request from Langston Construction Co. of Piedmont, LLC., under the provisions of section 11-35-4210 of the South Carolina Consolidated Procurement Code, for an administrative review of the Spartanburg-TRB Front Office Phase 1 Modular Office/Wall System bid ("the Project"), for Spartanburg Community College (SCC). Langston protests SCC's posting of a Notice of Intent to Award a contract for the project to Krueger International (KI).

On July 28, 2009, pursuant to S.C. Code Ann. §11-35-4210(4), the CPOC conducted an administrative review by hearing. At the hearing, attorney Daniel Patterson represented Langston, Mr. Jeff Strack represented KI, and Mr. Ray Switzer represented SCC. During the hearing, the CPO received Exhibits 1 through 8 into evidence, heard oral arguments, and took testimony from all parties. This decision is based on the evidence and testimony presented at the hearing and applicable law.

NATURE OF THE PROTEST

The letter of protest is attached and incorporated herein by reference. [Ex. A]

FINDINGS OF FACT

1. On May 25, 2009, SCC issued an Invitation for Construction Bids.¹ [Ex. B]
2. The bid documents sought bids to provide, install, and, as necessary, electrically wire ceiling height, moveable modular wall panels with and without doors, windows, and electrical outlets. [See plans and specifications Ex. C]
2. The bid documents required bidders to list their subcontractor for performance of electrical work.
3. On June 18, 2009, SCC opened bids received from Langston, KI, and Bonitz Contracting Co., Inc. KI was the apparent low bidder and Langston was the apparent second low bidder. [See Bid Tabulation, Hearing Exhibit 3]
4. KI listed T&G Electric on its bid as the electrical Subcontractor. [See KI's bid, Hearing Exhibit 1]
5. On June 19, 2009, SCC posted a notice of intent to award a contract to KI. [Hearing Ex. 4]
6. On June 25, 2009, Langston delivered its protest to the CPOC via email.
7. Installation of ceiling height, moveable modular wall panels is subject to the requirements of the 2006 International Building Code (IBC).² *See §105 of the IBC.*

¹ South Carolina applies the predominate factor test to determine if a transaction involving both goods and services is a transaction for the sale of goods or one for construction. *See Plantation Shutter Co., Inc. v. Ezell*, 328 S.C. 475, 492 S.E.2d 404 (S.C.App. 1997); *Kline Iron and Steel Co., Inc. v. Gray Communications Consultants, Inc.*, 715 F. Supp 135 (S.C. Dist. 1989). A pre-procurement analysis of this procurement under this test would have clearly shown that the predominate factor here is the purchase of manufactured goods not construction. In other words, it would have been more appropriate to conduct this procurement under the provisions of Article 5 of the Consolidated Procurement Code, not Article 9. Such an approach would have significantly changed the solicitation documents and lowered the cost to the state. For instance, there would have been no requirement for subcontractor listing, builder's risk insurance, performance and payment bonds, etc.

² Pursuant to SC Code Ann § 10-1-180, the Office of the State Engineer has adopted the 2006 IBC as the building code applicable to State facilities. Pursuant to SC Code Ann § 6-9-5 et seq., the South Carolina Building Codes Council has adopted the 2006 IBC for use by local jurisdictions.

DISCUSSION

RESPONSIVENESS

At the hearing, Langston raised for the first time the argument that KI's bid was not responsive because KI failed to list a contractor's license number for itself and failed to list a commercial electrical contractor's license number for its electrical subcontractor. "A protest ... must set forth both the grounds of the protest and the relief requested with enough particularity to give notice of the issues to be decided." *SC Code Ann § 11-35-4210(2)(b)*. While the specificity of a protest is not to be judged on highly technical or formal standards, the protest must "alert the parties to the general nature of the grounds for protest." *Protest of Sterile Services Corporation, Case No. 1983-17*. The CPOC finds that Langston's letter of protest was not sufficient to alert SCC, KI, or the CPOC of these additional issues. Because Langston raised these issues more than 15 days after the posting of Notice of Intent to Award, the CPOC may not consider them.³ See *SC Code Ann 11-35-4210(2)(b)*.

RESPONSIBILITY

In its letter of protest, Langston alleges that KI is not a responsible bidder as a matter of law. A determination of responsibility is required by S.C. Code Ann. § 11-35-1810, which states the "[r]esponsibility of the bidder or offeror shall be ascertained for each contract let by the State." A procurement officer's determination of responsibility is final and conclusive unless it is "clearly erroneous, arbitrary, capricious, or contrary to law." See *S.C. Code Ann. § 11-35-2410(A)*. The protestant has the burden of proving that the procurement officer's determination is "clearly erroneous, arbitrary, capricious, or contrary to law." See *Protest of Brantley Construction Co., Inc., Case No. 1999-3*.

Legal Ability of KI to Perform

In the letter of protest, Langston alleges that KI is not a licensed contractor as required by the Contractors Licensing Act (Act) found at Chapter 11, Title 40 of the South Carolina Code of Laws, as amended. For State procurement, the possession of a contractor's license required by

³ Even if the CPOC addressed these additional issues, these issues are minor informalities under SC Code Ann § 11-35-1520(13) and not a basis for rejecting a bid.

the Act is an issue of responsibility. See *Protest of Burkwood Construction Company, Inc., Case No. 1997-8*; *Protest of Roofco, Inc., Case No. 2000-14(I)*. A vendor that does not possess a required contractor's license does not have the legal ability to perform the work and may not be awarded a contract. *S.C. Code Ann. § 11-35-1520(10)* and *S.C. Code Ann. Regs. 19-445.2125(A)(4) & (D)*.

At the hearing, Langston expounded its position arguing that providing and installing moveable modular wall panels constitutes general contracting in excess of \$5,000 and that installation of these panels fell under the general contractor's - specialty license subclassification of interior renovation. Section 30 of the Act provides as follows:

No entity or individual may practice as a contractor by performing or offering to perform **contracting work** for which the total cost of construction is **greater than five thousand dollars** for **general contracting ... without a license** issued in accordance with this chapter. [emphasis added]

Moreover, the interior renovation subclassification of a general contractor - specialty license covers the following work:

[I]nstalling, remodeling, renovations, and finishes of acoustical ceiling systems and panels, load-bearing and nonload-bearing drywall partitions, lathing and plastering, flooring (excluding carpet) and finishing, interior recreational surfaces, **window and door** installation, and installation of fixtures, cabinets, and millwork; and which also includes fireproofing, insulation, lining, painting, **partitions**, sandblasting, interior wall covering, and waterproofing. This subclassification does not include alterations to load-bearing portions of a structure. [emphasis added] *SC Code Ann § 40-11-410(4)(c)*.

Langston argued for the coverage of this subclassification because KI's panels, upon installation, become partitions and some of the panels contain windows or doors. Langston also argued that upon installation, the panels become fixtures to the real property. In response to Langston's arguments, KI did not deny that it does not possess a contractor's license. However, KI argued that the installation of moveable modular wall panels does not improve real property and therefore is not "contracting work" as envisioned by the interior renovation subclassification or any other provision of the Act.

The scope of the interior renovation subclassification cannot be read in isolation from the rest of the Act and is necessarily limited by the scope of the terms "contracting work" and "general contracting" found in SC Code Ann § 40-11-30. The Act does not define the terms "contracting

work,” or “general contracting” used in Section 30. However, the Act does define a general contractor as “an entity which performs or supervises or offers to perform or supervise general construction.” *SC Code Ann § 40-11-20(9)*. The Act also defines a licensed contractor as “an entity that is licensed by the South Carolina Contractor's Licensing Board to engage in general ... contracting within the State.” *SC Code Ann § 40-11-20(13)*. Finally, the Act uses the term “general construction” in Sections 300(B), 360(B), 370(A), and 390 in association with the requirement to possess a contractor’s license. Therefore, by reading the Act as a whole, one must conclude that “general contracting” is the act of performing or offering to perform general construction. The Act defines general construction as “the installation, replacement, or repair of a building, structure, highway, sewer, grading, asphalt or concrete paving, or **improvement of any kind to real property.**” [emphasis added] *SC Code Ann § 40-11-20(8)*. Reducing this definition to its bare essence, it appears that general construction is the act of improving or offering to improve real property. Therefore the interior renovation subclassification only applies to partition, window, or door installations that constitute an improvement to real property. This interpretation is consistent with the exemptions provision of the Act which exempts “[t]he installation of finished products, materials, or articles of merchandise that are not fabricated into and do not become a permanent fixed part of the structure. *SC Code Ann § 40-11-360*. In essence, KI is arguing that their product is a finished product that is not fabricated into the structure and does not become a permanent fixed part of the structure and is not a partition as contemplated by the Act.

KI panels are moveable goods at the time they are identified to the contract and as such are chattels.⁴ However, these same wall panels can become fixtures by physically annexing them to a building. *Carson v. Living Word Outreach Ministries, Inc.*, 315 SC 64, 431 SE2d 615 (Ct. App. 1993); *Carjow, LLC v. Simmons*, 349 S.C. 514, 563 S.E.2d 359 (Ct. App. 2002). In determining whether an article is a fixture one must consider factors such as whether the item is attached in such a manner that its removal will damage the building (e.g. screw holes in a floor, wall, or ceiling); whether the character of the article is such that it is normally considered to be a part of the real property (e.g. pews in a church or wall cabinets in a kitchen); and whether the annexing party intended the article to become a fixture. *Hyman v. Wellman Enters.*, 337 SC 80, 522 SE2d 150 (Ct. App. 1999); *Carson*; and *Carjow*.

⁴ Chattel is defined as "An article of personal, movable property." American Heritage Dictionary (3d ed. 1994).

In support of its contention that KI panels do not become fixtures and therefore installing KI panels is not general construction, KI presented testimony and documentation that the panels do not permanently attach to the real property. From this testimony and documentation, it is clear the panels do not attach to the underlying floor or adjoining stud walls in any way. No screws or bolts are used to attach the panels to the building structure. When the panels are removed, there is no damage to the structure. Horizontal stability is imparted to the walls through the use of a simple clip that slips on to the ceiling grid (the thin metal strips that support suspended ceiling tiles and lay-in light fixtures) and is then tightened. Nothing is drilled into or screwed into the ceiling grid. When a clip is removed, there is no damage to the ceiling grid. On the other hand, testimony also made it clear that some of the panels to be supplied by KI will come with integral electrical wiring that an electrician must hardwire into the building's electrical system by splicing the wire in a junction box. However, the totality of the factors presented by KI suggest that using the factors traditionally used by the courts, the moveable modular wall panels will not become fixtures.

The Contractors' Licensing Board (Board) is the state authority primarily responsible for interpreting and enforcing the provisions of the Act. By long standing agreement, the Board Staff provides the CPOC with advisory opinions concerning the Board's interpretation of the Act. The CPOC traditionally gives great weight to the opinion of the Board Staff. While the greater weight of authority regarding fixtures may suggest that moveable panels of the type manufactured by KI do not become fixtures once installed, the Board's staff has advised the CPOC that they believe such panels do become fixtures regardless of whether or not they are electrically wired into the building. The Board staff has further advised the CPOC that installation of these panels is regulated work requiring possession of a general contractor's license with an interior renovation subclassification.

The Board staff has adopted the position that installation of ceiling height, moveable modular wall panels constitutes construction as contemplated by the Act because upon installation, KI's wall panels look and perform just like a typical stud wall with sheetrock. There is no real distinction between the two wall systems as far as the typical office occupant is concerned. The installation of both moveable wall panels and stud walls create barriers and corridors and an improper layout of either can impede the orderly and safe egress of the building occupants in an emergency. Additionally, an improper wall layout can negatively effect the proper operation of

HVAC systems and, if present, fire suppression systems. These hazards are widely recognized within the building and building safety industry as indicated by the fact that the IBC requires a building permit for the installation of moveable wall partitions exceeding 5' 9" in height. *See Section 105.2 of the IBC.*

The Act creates the Contractors' Licensing Board and charges it with the duty to regulate "businesses and individuals who identify, assess, and provide contract work to individuals or other legal entities" for the purpose of protecting "the health, safety, and welfare of the public." *SC Code Ann § 40-11-10(A)*. The Board has a concern that the unregulated installation of moveable, ceiling height, wall panels is contrary to this purpose. The Board is not alone in its concern. The South Carolina Building Codes Council, which adopts building codes to be used by all state jurisdictions, regulates building code inspectors, and regulates the modular building industry for the purpose of providing for "the health, safety, and welfare" of the public, has also advised the CPOC of its concern with the unregulated installation of moveable, ceiling height, wall panels.⁵ *See SC Code Ann § 6-9-5 et seq. and § 23-43-10 et. seq.* Because of this concern, the Board has an interest in interpreting the definition of a fixture broadly, perhaps more broadly than the courts have traditionally done. However, when looking at the case law regarding fixtures, it should be remembered that the courts are typically addressing whether an item attaches to the building for purposes of a contract for sale, not for purposes of providing for the health, safety, and welfare of a buildings occupants. From the standpoint of occupant safety, one might argue that there is a basis to find that moveable modular wall panels such as KI's panels have sufficient attachment, albeit ever so minimal, to the structure of the building to constitute a fixture.

Deferring to the position of the Board's staff does not resolve the issue in Langston's favor. The Board's staff has advised the CPO that a manufacturer does not need to possess a contractor's license to offer to provide and install its product provided the manufacturer uses a licensed contractor to perform the installation and the cost of the manufacturer's product is more than 51% of the total cost. [Ex. D] The Board staff bases this position on a Board policy approved on October 19, 2006 titled "General Policy by the S. C. Contractors' Licensing Board Regarding Licensure Requirements for Bid Work within South Carolina." [Ex. E] This policy, in part, provides as follows:

If the total cost of all unregulated work is 51% or more for a project and the project consists of some regulated work, an unlicensed entity or individual may bid the entire project provided the bidder has an active business that currently performs work related to the project. Consequently, the unlicensed entity or individual must subcontract any regulated work to properly licensed contractors when the total cost of each separate scope of regulated work exceeds \$5,000.

In this case, the testimony showed that KI is the manufacture of the wall panels it bid to SCC. Testimony also showed that KI subcontracts the installation work to others. Using the numbers provided by Langston, the cost of the modular wall panels is at least 75% of the total cost of the work. [Hearing Ex. 8] Since, 1) KI is directly offering to custom manufacture and install products to SCC's specifications, 2) manufacturing is not regulated by the Act, and 3) the total cost of this unregulated work exceeds 51% of the total cost, KI may offer to provide and install its product without possessing a contractor's license provided work requiring a license is performed by a licensed subcontractor.

Using Langston's bid preparation sheets, it is apparent that installation cost for this solicitation will exceed \$5,000; therefore, based on the foregoing discussion, the installation must be performed by a licensed subcontractor. The solicitation did not ask bidders to list their installation subcontractors. However, KI did notify SCC via email that its installer, Gil Smith and George Patton, possessed a contractor's license, with a license number of G111971. [Hearing Ex. 6] This license is assigned to G. A. S. Carpentry and Gilbert A. Smith, Jr. is listed as the qualifying party. [Ex. F] The license includes the license classification and group designations of BD3 and WL3. The BD designation is for the general construction-building license classification which includes the interior renovation subclassification. *See SC Code Ann § 40-11-410(1)*. The license group 3 designation allows a general contractor to bid and perform any job not exceeding \$350,000, which greatly exceeds the cost of installation. *SC Code Ann § 40-11-260(A)(3)*. Therefore, KI's installer is properly licensed to perform installation on this contract.

Legal Ability of KI's Listed Electrical Subcontractor to Perform

The fact that KI's installer is properly licensed to install the panels does not conclude the matter. KI's bid also includes electrical work that is not covered by the installer's license. In the letter of protest, Langston alleges that KI's listed electrical subcontractor, T & G Electric (T&G) is not a

⁵ The South Carolina Fire Marshal's Office and the Office of State Engineer share the Board and Council's concern for the safety of the public.

licensed commercial electrical contractor as required by the Contractors Licensing Act. Possession of the proper contractor's license by a bidder's listed subcontractors is an issue of bidder responsibility. Protest of Burkwood; Protest of Roofco. If, at the time of bidding, T&G did not possess the proper license for performing the electrical work on this project then KI is not a responsible bidder.⁶

Under the Act, electrical contracting is defined as mechanical contracting. *See SC Code Ann § 40-11-20(14) & (15)*. T&G possesses a residential electrical license limited to \$5,000, not a mechanical contractor's license issued by the Board. [Ex. G] However, KI argues that the total cost of the electrical work in their bid was less than \$5,000 and therefore T&G is not required to possess a mechanical contractor's license. In support of its position, KI submitted a copy of T&G's proposal showing a price of \$4,850.⁷ [Hearing Ex. 7] On the other hand, Langston submitted its bid work sheet along with the proposal from its listed electrical subcontractor, Holden Electrical Contractors, Inc. (Holden), showing a proposal price of \$8,750. [Hearing Ex. 8]

KI presented testimony that the reason that the price for the electrical work in their bid was so much lower than in its competitors' bids was that it manufactures its panels with much of the electrical integrated into the panels. Therefore, unlike their competitors, KI's electrician did not have to install receptacles, conduit, and wiring into the wall panels themselves. KI presented further testimony to the effect that T&G simply needed to tie the electrical pigtails that protrude out of the wall panels into the building's electrical system and that T&G's price included all labor and material necessary to do this. The scope of work outlined in Holden's proposal to Langston supports KI's contention regarding its competitor's panels. [Hearing Ex. 8] Moreover, the testimony of Langston's president, Mr. James W. Braswell, Jr., supported KI's contention concerning its competitors' panels. Mr. Braswell confirmed that the panels Langston bid did not include integral electrical receptacles and wiring and that this material and work was included in its electrical subcontractor's work.

The Act requires a mechanical contractor's license only when the "**total cost of construction**" exceeds \$5,000. *See SC Code Ann § 40-11-30*. The total cost of construction includes all

⁶ SC Code Ann § 11-40-200(B) precludes an owner or contractor from even considering the bid of an entity or individual that does not possess the proper license subclassifications at the time of bidding.

⁷ Langston objected to the admission of this Exhibit.

materials as well as labor necessary to perform the work. Usually such materials and labor are easy to identify and breakdown but here much of the electrical is integral to the manufactured wall panels and cannot easily be separated out and included in the value of T&G's work.⁸ Moreover, the Board Staff has advised the CPOC that the price of the electrical components installed into a manufactured product as a part of the manufacturing process should not be included in the value of the electrical work.⁹ Since T&G's bid covers all other electrical cost and is less than \$5,000, T&G is not required to possess a mechanical contractor's license.

DECISION

It is the decision of the Chief Procurement Officer for Construction that SCC's determination that KI and KI's listed electrical subcontractor were responsible was not clearly erroneous, arbitrary, capricious, or contrary to law.

For the foregoing reasons, Protest denied.

John St. C. White

⁸ There is no breakdown of the value of the electrical components within the panels or of the cost of manufacturing the electrical components into the wall panels. KI did acknowledge that if the value of the electrical components in its wall panels were included in T&G's work, the total value would exceed \$5,000.

⁹ The Board's position is sensible; otherwise, an owner would have to determine the values of the component parts of a myriad of manufactured products in determining licensure requirements. One can imagine the absurdity of an owner and the Board trying to determine the value of the electrical components of chillers, boilers, process equipment, etc., in order to analyze licensure requirements.

Hello Ray,

Sorry it's taken us a while to get back to you..... Summer is tough with everyone taking their vacations while school is out!

In researching, we found out that our installer does indeed have a SC license number. These two men work together as a team and install KI projects all over the Southeast. Below is their license number and names:

G111971

George Patton and Gil Smith

Hope this wraps up any outstanding questions. Please keep in mind, that in the future, it is not necessary to bid KI-Genius demountable/movable product using a contracting type of bid. Genius is not intended to be a permanent accession to real property, and should not fall under general construction, but is more of a FF&E product. KI-Genius falls under the SC State Contract "metal" furniture contract.

Just a reminder, we are getting behind in the time line and need to set a meeting out at the job site to take final measurements and select finishes.

When is a good time for you and your group?

Cheryl,

I've just spoken again with Michael Anderson with the SC Labor, Licensing, and Regulations (803-896-4613) on his determination on the licensing required for the modular wall system. He has again reviewed the system specifications and conferred with others in his office and his determination stands as was reported to me yesterday afternoon (see his below determination). Based on his determination, KI would have to have the commercial contractors license with the interior renovation classification (as defined).

On the matter of your electrical subcontractor license, based on the electrical dollar value quoted by your subcontractor it does not appear that is an issue with KI's bid.

I need your response to KI having the necessary license to perform the wall system installation as determined by the SCLLR.

Regards,
 Ray Switzer

Based on the documentation provided this will require at a minimum a commercial contractors license with a interior renovation classification. The electrical will require a licensed mechanical contractor with an electrical classification if the total cost of the electrical is over \$5,000.00 which would include all labor and material costs. Our interior renovation classification includes what is listed below.

"Interior Renovation" which includes installing, remodeling, renovations, and finishes of acoustical ceiling systems and panels, load-bearing and nonload-bearing drywall partitions, lathing and plastering, flooring (excluding carpet) and finishing, interior recreational surfaces, window and door installation, and installation of fixtures, cabinets, and millwork; and which also includes fireproofing, insulation, lining, painting, partitions, sandblasting, interior wall covering, and waterproofing. This subclassification does not include alterations to load-bearing portions of a structure.

EXH. #7

Wednesday, June 17, 2009

Ms. Ferguson,

T & G Electric, LLC proposes to install 15-120 volt, 20 amp circuits from existing panel RP5. Circuits will be installed using EMT and MC cable. Circuits will connect to existing wiring that has been stubbed above ceiling in 5 foot increments by wall contractor. T & G Electric will be connecting to wall contractor's flexible cable only, which should be a total of 21 cables. Circuitry combination to be determined by wall contractor to total 15 circuits. 3 additional circuits will be installed in junction box above ceiling for future access. These circuits will not be connected to breakers. We propose the above for \$4850.00. Please note that upon evaluation of panel RP5 at our most recent visit to the job site, the panel had 12 remaining available spaces. This estimate may change if provisions need to be made for additional circuitry.

Also, per your request, our license # for the state of S.C. is RBE 2155. Please let us know if you have any further questions or concerns. Thank you,

RE: Project H59-H518-JM
Spartanburg Community College
Phase 1 Modular Office / Wall System
Bid Date: June 18, 2009

Dear Mr. White,

We wish to register a protest of the June 19, 2009 intent to award the above referenced project to Krueger International.

Our protest is based on two facts:

1. Krueger International is not a licensed contractor in the state of South Carolina.
2. Krueger International listed an improperly licensed subcontractor on the bid form.

The South Carolina code of Laws Title 40 Chapter 11 requires this work to be performed by properly licensed contractors. We request that the bid from Krueger International be rejected and the project be awarded to Langston Construction Co. of Piedmont, LLC.

If you need additional information please do not hesitate to contact me.

Sincerely,

LANGSTON CONSTRUCTION CO. OF PIEDMONT, LLC

The Agency reserves the right to conduct discussions with apparent responsive bidders for the purpose of clarification to assure full understanding of the requirements of the Invitation for Bid.

The Notice to Proceed will be issued to the Contractor in writing, no less than seven (7) days prior to the Date of Commencement. - 3.4 *Add the following new Paragraphs 3.4 and 3.5 to the end of Article 3:*
 - 3.4 The Contractor acknowledges and recognizes that the Agency is entitled to full and beneficial occupancy and use of the completed Work following expiration of the Contract Time. 3.77 Insert the following Paragraph 7.5:

7.5 PRICE ADJUSTMENTS

7.5.1 METHODS OF ADJUSTMENT. Any adjustment in the Contract Sum made pursuant to this Paragraph 7.5 shall be consistent with this Contract and shall be arrived at through whichever one of the following ways is the most valid approximation of the actual cost to the Contractor:

7.5.1.1 by agreement on a fixed price adjustment;

7.5.1.2 by unit prices specified in the Contract or subsequently agreed upon;

7.5.1.3 by the costs attributable to the event or situation covered by the relevant clause, including profit if otherwise allowed, all as specified in the Contract; or subsequently agreed upon;

7.5.1.4 in such other manner as the parties may mutually agree; or,

7.5.1.5 in the absence of agreement by the parties, through a unilateral initial determination by the A/E of the costs attributable to the event or situation covered by the clause, including profit if otherwise allowed, all as computed by the A/E in accordance with Clause 7.5.3.2, and subject to review under the provisions of Paragraph 4.5 of this Contract.

7.5.2 FINAL AGREEMENT. When any adjustment in the Contract Sum made pursuant to clauses in this Contract becomes final (e.g., by agreement or dispute resolution), the adjustment shall be computed and documented on a Change Order.

7.5.3 DOCUMENTATION OF COST REASONABLENESS

7.5.3.1 CONTRACTOR'S CHANGE ORDER PROPOSAL. The Contractor shall submit a written proposal for review by the A/E and the Agency. The proposal shall be submitted to the Agency's representative within the time limits specified in Subparagraph 4.3.2. All costs claimed by the Contractor shall be justifiable compared with prevailing industry standards, as adjusted for local cost conditions. Costs shall be properly itemized and supported by substantiating data sufficient to permit evaluation before commencement of the pertinent performance or as soon thereafter as practicable.

7.5.3.2 CONSTRUCTION CHANGE DIRECTIVES. For a Construction Change Directive wherein the proposed method of compensation is actual costs, and pending the collection and evaluation of actual costs as required by Clause 7.5.1.3, the Contractor shall estimate the value of the changed work. The Contractor shall itemize the estimated cost into building components and shall use the labor, material and equipment unit direct costs as listed in the most current issue of the Construction Cost Data Book most applicable to the nature of the changed work, as published by R. S. Means, with a cost index adjusted for the project locale. The Contractor shall also be permitted to add overhead and profit as shown in Subparagraph 7.5.4. Where the Contractor does not properly itemize the proposed costs as requested, the A/E shall provide the Agency with the itemization and this amount shall be the initial basis for compensation under Subparagraph

7.3.8. Upon conversion of the Construction Change Directive to a Change Order, the A/E's cost for providing this itemization shall be deducted from the final adjustment in the Contract Sum as described in Clause 7.3.9.

7.5.4 AGREED OVERHEAD AND PROFIT RATES

7.5.4.1 For any adjustment to the Contract Sum for which overhead and profit may be recovered, other than those made pursuant to Subparagraph 4.3.9, the Contractor agrees to charge and accept, as full payment for overhead and profit, the following percentages of costs attributable to the change in the Work. The percentages cited below shall be considered to include all indirect costs including, but not limited to: field and office managers, supervisors and assistants, incidental job burdens, small tools, and general overhead allocations. The allowable percentages for overhead and profit are as follows:

- (1) To the Contractor on work performed by his own forces, 17% of the cost;
- (2) To each Subcontractor involved, on work performed by their own forces, 17% of the cost;
- (3) For the Contractor, for work performed by his subcontractors, 10% of the amount due the Subcontractor.

7.5.4.2 Using the percentages stated in Clause 7.5.4.1, any adjustment to the Contract Sum for deleted work shall include any overhead and profit attributable to the cost for the deleted Work.

7.5.4.3 If the Contractor initiates a Change Order proposal and the Agency is not obligated to pay for all or any part of the proposal, then the Contractor shall be responsible for any A/E's fees to evaluate and process that Change Order proposal. Compensation shall be based on the Agency's contract with the A/E and the rates for Additional Services contained therein, and shall be withheld from the final payment to the Contractor.

7.5.5 COST OR PRICING DATA

7.5.5.1 The Contractor shall submit cost or pricing data for any element of changed work (other than Unit Price Work) which exceeds \$25,000.00, and shall certify that, to the best of its knowledge and belief, the cost or pricing data submitted is accurate, complete, and current as of a mutually determined specified date prior to the date of the pricing. This data shall be itemized and supported by substantiating data sufficient to permit evaluation before commencement of the pertinent Work, or as soon thereafter as practicable, and shall be justifiably compared with prevailing industry standards. As requested by the A/E or the Agency, the Contractor's submittal shall provide an itemized breakdown of all increases and decreases in the Contract for the Contractor and each subcontractor (at any tier) in at least the following detail: material, equipment and supply quantities and costs; direct labor hours and rates for each trade; the associated FICA, FUTA, SUTA, and Worker's Compensation Insurance; equipment hours and rates, and costs of premiums for bonds and insurance, permit fees and sales, use or similar taxes related to the Work.

7.5.5.2 Any Change Order or Change Directive for which certification is required shall contain a provision that the price to the Agency, including profit or fee, shall be adjusted to exclude any significant sums by which the Agency finds that such price was increased because the cost or pricing data furnished by the Contractor was inaccurate, incomplete or not current as of the date agreed upon between parties. Notwithstanding Subparagraph 9.10.4, such adjustments may be made after final payment to the Contractor.

3.78 *Delete Subparagraph 8.1.2 and substitute the following:*

8.2.4 Failure by the Contractor to commence actual physical work on the project within seven (7) days from the Date of Commencement as established in the Notice to Proceed, will entitle the Agency to consider the Contractor in substantial breach of its obligations under this Contract. In this event, the Agency may withdraw the Notice to Proceed and terminate the Contract in accordance with the Contract Documents.

3.81 *Change "...mediation and arbitration..." to "...dispute resolution..." in Subparagraph 8.3.1.*

3.82 *Insert the following new Subparagraph 8.3.4:*

8.3.4 The Contractor shall be permitted an adjustment in the Contract Sum, determined in accordance with Paragraph 7.5, only if the Delays, either individually or taken in the aggregate, cause the Contract Time to be increased by more than seven (7) days.

3.83 *Insert the following new subparagraph 9.2.2:*

9.2.2 As requested by the A/E, the Contractor and each Subcontractor shall prepare a trade payment breakdown for the Work for which each is responsible, such breakdown being submitted on a uniform standardized format approved by the A/E and Agency. The breakdown shall be divided in detail sufficient to exhibit areas, floors, and/or sections of the Work, and or by convenient units and shall be updated as required by either the Agency or the A/E as necessary to reflect

9.2.2.1 the description of Work (listing labor and material separately);

9.2.2.2 the total value;

9.2.2.3 the percent and value of the Work completed to date;

9.2.2.4 the percent and value of previous amounts billed; the current percent completed and amount billed; and,

9.2.2.5 the current percent completed and amount billed.

Any schedule of values or trade breakdown that fails to include sufficient detail, is unbalanced, or exhibits "front-loading" of the value of the Work, shall be rejected. If either the schedule of values or trade breakdown had been initially approved and subsequently used, but later was found improper for any reason, then sufficient funds shall be withheld from future Applications for Payment to ensure an adequate reserve (exclusive of normal retainage) to complete the Work.

3.84 *In the first sentence of Subparagraph 9.3.1 change "... ten days..." to "...twenty-one (21) days...".*

Add the following sentence to Subparagraph 9.3.1:

The Contractor's Application for Payment shall be in a form acceptable to the Agency. The A/E will authorize, as provided in Paragraph 9.4 and until the final pay request, monthly payments equal to ninety-six and one-half percent (96½%) of the portion of the Contract Sum properly allocable to labor, material and equipment incorporated in the Work, and allocable to material and equipment suitably stored.

The A/E's endorsement is a convenience to the Agency only and shall not relieve the Contractor of its responsibility in the matter, nor shall the A/E's endorsement be deemed to be evidence that the Work was substantially complete and ready for inspection and testing. In the event that the A/E does not concur with the Contractor's statement, the A/E shall inform the Contractor of the basis for the A/E's non-concurrence. The Contractor may then, at its sole option, (1) defer the inspection; or, (2) request the inspection be performed in accordance with Subparagraph 9.8.3.

9.8.3.3 The A/E and its Consultants shall conduct all Substantial Completion inspections. The Agency may elect to have other persons of its choosing also participate in the inspections. 9.8.3.4 If the inspection discloses any item which is not in accordance with the requirements of the Contract Documents and will prevent the Agency from occupying or utilizing the Work for its intended use, the Contractor shall complete or correct such item upon notification by the A/E. 9.8.3.5 The Contractor shall proceed promptly and diligently to complete and correct items on the list of Unfinished or Defective Work. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH THAT:

1. The Contractor and the Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors and assigns to the Agency for the full and faithful performance of the contract, which is incorporated herein by reference.
2. If the Contractor performs the contract, the Surety and the Contractor have no obligation under this Bond, except to participate in conferences as provided in paragraph 3.1.
3. The Surety's obligation under this Bond shall arise after:
 - 3.1 The Agency has notified the Contractor and the Surety at the address described in paragraph 10 below, that the Agency is considering declaring a Contractor Default and has requested and attempted to arrange a conference with the Contractor and the Surety to be held not later than 15 days after receipt of such notice to discuss methods of performing the Contract. If the Agency, the Contractor and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Contract, but such an agreement shall not waive the Agency's right, if any, subsequently to declare a Contractor Default; or
 - 3.2 The Agency has declared a Contractor Default and formally terminated the Contractor's right to complete the Contract.
4. The Surety shall, within 15 days after receipt of notice of the Agency's declaration of a Contractor Default, and at the Surety's sole expense, take one of the following actions:
 - 4.1 Arrange for the Contractor, with consent of the Agency, to perform and complete the Contract; or
 - 4.2 Undertake to perform and complete the Contract itself, through its agents or through independent contractors; or
 - 4.3 Obtain bids or negotiated proposals from qualified contractors acceptable to the Agency for a contract for performance and completion of the Contract, arrange for a contract to be prepared for execution by the Agency and the contractor selected with the Agency's concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the Bonds issued on the Contract, and pay to the Agency the amount of damages as described in paragraph 7 in excess of the Balance of the Contract Sum incurred by the Agency resulting from the Contractor Default;
 - 4.4 Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and:
 - 4.4.1 After investigation, determine the amount for which it may be liable to the Agency and, within 60 days of waiving its rights under this paragraph, tender payment thereof to the Agency; or
 - 4.4.2 Deny liability in whole or in part and notify the Agency, citing the reasons therefore.
5. Provided Surety has proceeded under paragraphs 4.1, 4.2, or 4.3, the Agency shall pay the Balance of the Contract Sum to either:
 - 5.1 Surety in accordance with the terms of the Contract; or
 - 5.2 Another contractor selected pursuant to paragraph 4.3 to perform the Contract.
- 5.3 The Balance of the Contract Sum due either the Surety or another contractor shall be reduced by the amount of damages as described in paragraph 7.
6. If the Surety does not proceed as provided in paragraph 4 with reasonable promptness, the Surety shall be deemed to be in default on this Bond 15 days after receipt of written notice from the Agency to the Surety demanding that the Surety perform its obligations under this Bond, and the Agency shall be entitled to enforce any remedy available to the Agency.

- 6.1 If the Surety proceeds as provided in paragraph 4.4, and the Agency refuses the payment tendered or the Surety has denied liability, in whole or in part, then without further notice the Agency shall be entitled to enforce any remedy available to the Agency.
- 6.2 Any dispute, suit, action or proceeding arising out of or relating to this Bond shall be governed by the Dispute Resolution process defined in the Contract Documents and the laws of the State of South Carolina.
7. After the Agency has terminated the Contractor's right to complete the Contract, and if the Surety elects to act under paragraph 4.1, 4.2, or 4.3 above, then the responsibilities of the Surety to the Agency shall be those of the Contractor under the Contract, and the responsibilities of the Agency to the Surety shall be those of the Agency under the Contract. To a limit of the amount of this Bond, but subject to commitment by the Agency of the Balance of the Contract Sum to mitigation of costs and damages on the Contract, the Surety is obligated to the Agency without duplication for:
 - 7.1 The responsibilities of the Contractor for correction of defective Work and completion of the Contract; and
 - 7.2 Additional legal, design professional and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under paragraph 4; and
 - 7.3 Damages awarded pursuant to the Dispute Resolution Provisions of the Contract. Surety may join in any Dispute Resolution proceeding brought under the Contract and shall be bound by the results thereof; and
 - 7.4 Liquidated Damages, or if no Liquidated Damages are specified in the Contract, actual damages caused by delayed performance or non-performance of the Contractor.

General Policy by the S. C. Contractors' Licensing Board Regarding Licensure Requirements for Bid Work within South Carolina

Upon review of the wording of the statutes, the Board has developed the following policy that addresses licensure for bidding a construction project that contains regulated work including the construction of recreational surfaces or golf courses.

Section §40-11-30 of the 1976 Code of Laws of South Carolina, as amended, prohibits an unlicensed entity or individual from performing or offering to perform regulated construction work if the total cost of the project is greater than \$5,000 and the nature of the work falls within one of the general or mechanical contractor major or subclassifications, a proper license is required for each regulated portion(s) of work, provided each portion exceeds \$5,000. An unlicensed or improperly licensed entity or individual may be subject up to a \$5,000 fine for bidding or engaging on a project without obtaining a proper contractor license. The total cost of construction, including all labor, profit, and material, regardless of who buys and pays for the materials, determines whether or not a license is required.

In order to determine if a contractor license is required for a construction project, it must be determined which license classification, if any, is required to be the prime contractor. A licensed general contractor may submit a bid for the entire project if 40% of the total cost of construction is within his/her license classification and group limitation. A general contractor holding a specialty classification or a mechanical contractor may submit a bid for the entire project if 51% of the total cost of construction is within his/her license classification and group limitation.

Should no scope of regulated work in the project equal or exceed 40%, any properly licensed general contractor licensee, with a portion of work in the project may bid the project. All regulated work not covered under the prime contractor's license must be subcontracted to properly licensed contractors. If the total cost of all unregulated work is 51% or more for a project and the project consists of some regulated work, an unlicensed entity or individual may bid the entire project provided the bidder has an active business that currently performs work related to the project. Consequently, the unlicensed entity or individual must subcontract any regulated work to properly licensed contractors when the total cost of each separate scope of regulated work exceeds \$5,000.

The owner of a construction project may elect to hire multiple prime contractors for all of the regulated work based upon 40-11-420(C) and hire any unlicensed entity or individual for work that is not regulated. If the owner is hiring separate multiple prime contractors for regulated work, all of the contractors hired for this work must be properly licensed regardless of the cost of the work.
